IMAGE DENOISING USING A CONVOLUTIONAL NEURAL NETWO

Abstract

A method for denoising an image includes receiving
convolutional neural network to the noisy image, a
The convolutional neural network includes a featur
reconstruction stage.

Description

[0001] The present disclosure relates to image pro
to image denoising using deep learning.

[0002] Conventional image denoising methods inclu

[0003] In one embodiment, the feature extraction s
from the noisy image. In another embodiment, the r
denoised image from the extracted features.

Claims

1. A method for denoising an image, comprising:
   receiving a noisy image;
   applying a convolutional neural network to the
   outputting a denoised image.
